DE MENEZES VICTOR LEANDRO

FULL STACK DEVELOPER

React • Node.js • TypeScript | Remote Ready | Bilingual (ES/EN)

victorleandrodemenezes@gmail.com | vldm.is-a.dev |linkedin.com/in/demenezesvictor/ | github.com/VLDeMenezes

Passionate about technology and process automation. My self-taught, resilient, and results-oriented approach has allowed me to integrate technical and analytical skills to solve complex problems with creative and scalable solutions. Solid knowledge of HTML, CSS, JavaScript, TypeScript, React, Next.js, Node.js, Express, NestJS, MongoDB, and PostgreSQL, I combine experience in interface design, RESTful API consumption, implementation of modern architectures, and version control (Git). My hybrid profile allows me to communicate clearly, lead processes, and deliver value on both the frontend and backend of modern web applications.

Work History

1) BELAND

Remote Part-Time — Sep 2025 – Now

FrontEnd developer for a web3 company creating is own chain.

Stack: React Native, Expo, TypeScript, QR, CryptoJs, Socket.io, Zustand

SurveyApp PWA
📇 2025

An Progressive Web Application for pollsters focused on political and partisan interests. Intuitive interface built on a mobile-first foundation. CRUD for surveys, stages, users, and automatic generation of analytics and progress.

Milagros Cosmetic
📇 2025

E-commerce offering products, blogs, and courses for a one-person Dermocosmetics business. With search engine optimization and positioning through SEO.

Gilson Regalos

📅 2025

Single Page Aplication for a toy store, with a CTA for contact and sales via WhatsApp, in addition to the reproduction of promotions, articles, and an about page with the company's history.

SumarioLegalApp

📅 2024

AI-powered application that allows the upload of court rulings and decisions, summarizing them for historical summary purposes.

NearVet

📅 2024

I developed a veterinary E-commerce platform that allows veterinarians and users to schedule appointments, manage online or in-person checkups, and maintain an active clinical history. The project also includes a payment gateway, electronic invoicing, and scheduled email notifications.

ShopAll

📅 2023

I developed ShopAll, an e-commerce platform for selling tech items with full authentication on both the front and back ends. The project focused on a responsive, minimalist, and user-experience-oriented design.

LeyriaApp

📅 2022

I designed an interactive SPA to schedule appointments online at the law firm, as well as view achievement history and certificates.

Non-IT sector:

- **Leyria & De Menezes -** Private attorney, specializing in criminal and civil law cases, managing a diversified client portfolio with experience in client service, petty cash management, contracting for accounting procedures, and also developing the main legal activity: Litigation. - 2020–2024
- **Education Planning, Ministry of Sports -** I made notes and entered administrative files within the Ministry of Sports on behalf of the Undersecretary. - 2021–2023
- **Gilson Regalos -** I worked at a multi-sector retail company, where I provided customer service and sold products to the public. I also worked as a cashier, managing petty and cash, coordinating deposits, transfers, and bank accounts for the company owner. - 2012–2014
