VICTOR LEANDRO DE MENEZES

Senior Software Engineer — React / React Native | AI-Native Engineering

+34 697 324 854 | Barcelona, Spain | victorleandrodemenezes@gmail.com

Portfolio: vldm.is-a.dev | **LinkedIn:** linkedin.com/in/demenezesvictor | **GitHub:** github.com/VLDeMenezes

Professional Summary

AI-Native Full Stack Mobile Engineer with 6+ years of experience building scalable applications using React, React Native, TypeScript, Next.js, and Node.js. Pioneer in leveraging modern AI-assisted software engineering practices, specializing in **AI Harnessing, Model Context Protocol (MCP / WebMCP), Agentic Workflows, and Long-Term Memory / Context Management**. Expert at implementing Spec-Driven Development (SDD) and multi-agent harnesses with strict guardrails to accelerate feature delivery, streamline QA automation, and maintain architectural integrity across fintech, Web3, and enterprise platforms.

Technical Skills

AI & Agentic Engineering: AI Harnessing, Model Context Protocol (MCP), WebMCP, Context Management, Memory Systems, Agentic Systems & Sub-Agents Workflows, Guardrails, Spec-Driven Development (SDD), Prompt Engineering, OpenCode, Claude Code, Cursor, Copilot, LLM APIs Integration
Frontend: React, React Native, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, NativeWind, Responsive Design, Component-Based Architecture, TanStack Query, Zustand, Context API, Redux
Mobile: React Native, Expo, Expo Router, React Navigation, Expo APIs, NativeWind, Mobile UI Development, Cross-Platform Development
Backend: Node.js, Express.js, NestJS, REST APIs, PostgreSQL, MongoDB, Prisma ORM, Docker, Kubernetes
Testing & Automation: Jest, Vitest, React Testing Library, Playwright, Puppeteer, Automated AI Harness Testing
Cloud, DevOps & Infrastructure: AWS, Git, GitHub, GitHub Actions, CI/CD, Vercel, Railway, Render, Cloud Deployment
Monitoring & Quality: Sentry, Firebase Crashlytics, ESLint, Prettier, Clean Code, SOLID Principles, Technical Documentation, Spec Driven Development

Professional Experience

Founding Product Engineer – Full Stack & AI Systems Sep 2025 – Present
Beland *Remote*

- Spearheaded the end-to-end development of multiple high-impact web and mobile products for external clients through strategic alliances, utilizing **React, React Native, Next.js, Node.js, NestJS, and Python**.
- Designed and deployed an **AI Harnessing framework** with custom agents, sub-agents, and dynamic context injection, boosting team engineering velocity by over 40%.
- Integrated **Model Context Protocol (MCP) servers** and **WebMCP** tools to grant agentic workflows real-time access to application context, database schemas, and external API specifications.
- Architected scalable, modular frontend structures and unified component libraries across web and mobile platforms, drastically reducing technical debt and accelerating feature delivery by 25%.
- Built and maintained robust backend services and micro-apps using **Node.js, NestJS, and Python**, ensuring seamless integration with multi-platform client applications.
- Implemented automated Playwright and E2E testing pipelines driven by agentic test harnesses, covering over 20 core user journeys with minimal maintenance overhead.
- Mentored team members on Spec-Driven Development (SDD) and AI-assisted workflows, establishing strict code quality standards and automated review gates.

Technologies: React, React Native, Next.js, Node.js, NestJS, Python, TypeScript, REST APIs, MCP, WebMCP, AI Harnessing, AWS, Playwright, CI/CD, Git.

Frontend Engineer / Full Stack Developer Apr 2025 – Sep 2025
AWAQ – Contract / Project-based *Remote*

- Applied AI-assisted coding tools and spec-driven workflows to build performant React components optimized for low-latency web access.
- Decreased feature development time by 30% across frontend and backend modules by building 6+ reusable UI components integrated with custom Node.js and Express.js REST APIs.
- Maintained continuous operations and cross-system alignment by extending custom SAP functionality and enterprise business integrations.
- Streamlined release cycles and eliminated manual deployment errors by engineering automated CI/CD workflows using GitHub Actions.

- Facilitated rapid developer onboarding in an Agile environment by authoring core architecture documentation and leading technical mentorship.

Technologies: React, Node.js, Express.js, TypeScript, REST APIs, Kubernetes, SAP, GitHub Actions, CI/CD, Agile.

Frontend / Full Stack Developer Nov 2024 – Mar 2025
Happ3n XYZ – Contract / Project-based *Remote*

- Expanded market reach across international user bases by delivering multi-language support (i18n) and responsive & accessible React/React Native Web3 interfaces.
- Achieved on-time delivery of 3 major Web3 platform features by coordinating end-to-end integration between frontend UI and RESTful backend microservices.
- Ensured 99.9% deployment uptime across staging and production environments by orchestrating automated cloud deployments on Vercel and Railway.

Technologies: React, React Native, TypeScript, NestJS, Docker, Web3, i18n, REST APIs, Storybook, Vercel, Railway.

Frontend / Full Stack Developer Mar 2020 – Nov 2024
Prisma Technologies *Remote*

- Successfully delivered custom web and mobile products from requirement analysis to deployment using React, Next.js, React Native, and Node.js.
- Reduced client platform integration friction by designing full-stack workflows, RESTful API architectures, and enterprise SAP ecosystem connections.
- Engineered database modeling, built authentication/authorization microservices (JWT/OAuth), and executed zero downtime data migrations.
- Maintained cross-platform code consistency and performance across client deliverables through standard software architecture practices (SOLID, Clean Code).

Technologies: React, Next.js, React Native, Node.js, NestJS, Docker, Kubernetes, Angular, TypeScript, REST APIs, SAP, Software Architecture.

Featured Projects

RNFactory — React Native and Expo AI-Native application factory designed to accelerate mobile bootstrapping through AI Harnessing, dynamic context management, MCP integrations, and monorepo architectures.

Lobacounter — Cross-platform mobile score-tracking app built with React Native and Expo (published on Google Play Store), featuring real-time state management and automated score calculations.

SurveyApp — Progressive Web Application (PWA) for political surveys featuring dynamic chart visualizations and real-time response aggregation.

Gilson Regalos — Production e-commerce platform with automated SEO optimization, dynamic product catalogs, and custom responsive UI.

Sumario Legal API — Automated legal text processing API utilizing LLM context structuring to transform unformatted legal documents into standardized templates.

Education & Bootcamps

Advanced Full Stack Software Engineering Program Issued: 2024
Soy Henry
Intensive specialization in full-stack architecture, clean code principles, RESTful API design, and Agile teamwork.

Web Development and Logical Thinking Issued: 2020
Silicon Misiones
Fundamentals of software architecture, object-oriented logic, and web application development.

Law Degree Issued: 2014-2018
Universidad Catolica de Santa Fe - Sede Posadas

Certifications & Professional Training

Python Fundamentals & AI Scripting Issued: 2026
Santander Open Academy

AWS: Cloud, Serverless y Operations Issued: 2026
Commit Academy
Cost efficiency, Good Practices, Serverless and Responsibilities

AWS Cloud Practitioner Essentials Issued: 2026
AWS Skills Builder
Cloud architecture, EC2, S3, IAM, VPC, RDS, security, and AWS Well-Architected Framework.

DevOps Cloud Issued: 2025
Oracle University
Microservices deployment, CI/CD automation, and cloud environment management.

App Mobile Development & Web Development Issued: 2023
Google Developer Program
Mobile/Web UX patterns, Mobile-First design systems, and web accessibility standards.
